(a) Evolution of the luminescence signal

(b) Evolution of the luminescence signal

(c) Evolution of the luminescence signal

(d) Evolution of the luminescence signal

(e) Probability distribution

(f) Probability distribution

(g) Probability distribution

(h) Probability distribution

Synthetic values
\[ \varepsilon = 10^{-2} \text{ mm a}^{-1} \]
\[ t_s = 1 \text{ a} \]
TCN exposure age
\[ t_0 = 16428 \pm 707 \text{ a} \]
\[ t_{c_{\text{max}}} = 16428 \pm 707 \text{ a} \]
